TK1

High

15.1

U/L

Normal: ≤ 2.9
 Equivocal (E): 3.0 - 8.9
 High (H): ≥ 9.0

Significant Change

CRP

Normal

1.9

mg/L

Normal: ≤ 3.9
 Mild Inflamm (m): 4 - 9.9
 Mod Inflamm (M): 10 - 39.9
 High Inflamm (H): ≥ 40

CAR: 0.6

Interpretative Comment

Patient values for TK1 are above the critical threshold of 9U/L, but without an inflammatory response. TK1 has significantly increased from prior testing. Evaluate patient evaluation for disease recurrence. Continue monitoring for further increases in TK1 and CRP. Patient CRP/Albumin Ratio (CAR) is within normal limits.

Gaps in charting occur when there is more than 6 months between testing intervals

3.4

Spec ID	Date	TK Value	CRP Value	Neoplasia Index*
437873	03-May-21	25.5	3.8	5.3
443551	14-Jun-21	9.0	0.8	5.3
443553	06-Sep-21	15.1	1.9	5.3

*Neoplasia Index is primarily used for initial diagnosis, and is typically not associated with patients undergoing therapy for known cancer.

Additional Reviewer Comments

Code 3154.1
