

PATIENT NAME: Kobe Martin
SPECIMEN ID: 555555
SPECIES: Feline
GENDER: Female Spayed
AGE: 9.2
WEIGHT: 8.9 lb
BREED: Siamese

MRN: 1072444
DRAW DATE: 1-Sep-21
RECEIVED DATE: 5-Sep-21
REPORT DATE: 9-Sep-21
SAMPLE TYPE: Dried Serum - 2

Normal (N): 268 - 1478
High (H): ≥1479

Low (L): <7.3
Normal (N): 7.3 - 21.6
High (H): > 21.6

Interpretive Comments

Results are **INCONSISTENT** with GI LSA

Patient's Neoplasia Index is negative and inconsistent with intestinal lymphoma. This profile of TK1/ HPT/ B12 is consistent with inflammatory bowel disease. An ultrasound is recommended.

Interpretive Comments

Results are consistent with: **IBD**

TK1 is within the reference interval with a mild inflammatory response and commonly found in inflammatory bowel disease. If the patient is on corticosteroids, both TK1 and HPT may be higher as these medications suppress the inflammatory and proliferative response.

Interpretive Comments

Patient has low normal B12 levels with normal Folate. Supplement as indicated and retest in 8-10 weeks.

Contextual Comments (if needed)

profile code 10230 IBD

* The classification of LSA is based upon test result profiling and should not be considered definitive. It is most reliable in the untreated cat. Patient disease classification will be affected if the patient is on corticosteroids or other anti-inflammatory or anti-proliferative medications. An ultrasound is always recommended and should be supportive of test results. If ultrasound and test results conflict, it is recommended the test be repeated in 3-4 weeks with the patient off of corticosteroids. If the test requisition indicates the patient is on corticosteroids, the Neoplasia Index will be adjusted for the effect medication may have on TK1/HPT. For definitive disease classification (eg, small cell, large cell), a biopsy is required.

New Recommended B12 Dose

Fasted Sample?	Unknown
82 mcg/day	
B12 dosing recommendations are for daily supplementation. Continue indefinitely unless changes in health or diet require modification.	

Patient History

ID	Date*	B12 pg/mL	Folate ng/mL	Known B12 Dose mcg/day

*B12 results run prior to 9/7/21 use a different reference range and do not align with current reference range. Contact VDI with questions.

Comments

Patient has low normal B12 levels with normal Folate. Supplement as indicated and retest in 8-10 weeks.

Total B12 Dose Recommended:

82 mcg/day

PRODUCT NAME	PRODUCT STRENGTH	PRODUCT FORMAT	Drops Dose	mL Dose
