

PATIENT NAME: Kobe Martin
SPECIMEN ID: 555555
SPECIES: Feline
GENDER: Male Neutered
AGE: 10.0
WEIGHT: 11.9 lb
BREED: DMH

MRN: 1072781
DRAW DATE: 1-Sep-21
RECEIVED DATE: 10-Sep-21
REPORT DATE: 13-Sep-21
SAMPLE TYPE: Dried Serum - 2

Low (L): <7.3
Normal (N): 7.3 - 21.6
High (H): > 21.6

Interpretive Comments

Results are consistent with LSA

Patient has a positive Neoplasia Index indicative of GI lymphoma. This profile of TK1/ HPT/ B12 is consistent with possible small cell lymphoma*. An ultrasound is recommended.

Interpretive Comments

Elevated TK1 levels along with a mild inflammatory response are commonly found in small cell LSA. If the patient is on corticosteroids, both TK1 and HPT may be higher as these medications suppress the inflammatory and proliferative response.

Interpretive Comments

Patient has High B12 with normal Folate. Most commonly associated with excess supplementation or dietary intake.

Contextual Comments (if needed)

profile code 31250 possible SMALL CELL LSA

* The classification of LSA is based upon test result profiling and should not be considered definitive. It is most reliable in the untreated cat. Patient disease classification will be affected if the patient is on corticosteroids or other anti-inflammatory or anti-proliferative medications. An ultrasound is always recommended and should be supportive of test results. If ultrasound and test results conflict, it is recommended the test be repeated in 3-4 weeks with the patient off of corticosteroids. If the test requisition indicates the patient is on corticosteroids, the Neoplasia Index will be adjusted for the effect medication may have on TK1/HPT. For definitive disease classification (eg, small cell, large cell), a biopsy is required.

B12 Dose at time of draw: **0 mcg/day**

Increase B12 dose by: **0 mcg/day**

New Recommended B12 Dose

Fasted Sample?	Unfasted
0 mcg/day	
B12 dosing recommendations are for daily supplementation. Continue indefinitely unless changes in health or diet require modification.	

Patient History

ID	Date*	B12 pg/mL	Folate ng/mL	Known B12 Dose mcg/day

*B12 results run prior to 9/7/21 use a different reference range and do not align with current reference range. Contact VDI with questions.

Comments
Patient has High B12 with normal Folate. Most commonly associated with excess supplementation or dietary intake.

Total B12 Dose Recommended: **0 mcg/day**
