

# NutriFlex

## With Glucosamine Sulfate and Sea Cucumber

NutriFlex provides three chondroprotective agents, glucosamine sulfate, bovine tracheal cartilage and sea cucumber that help to maintain healthy articular cartilage, tendons and ligaments. The plant-based antioxidants found in curcumin, ginger and boswellia support healthy mobility. Nutritional co-factors such as calcium, magnesium, zinc, copper and manganese are used by the entire body, particularly cartilaginous tissues. NutriFlex contains glucosamine, a vital component of joint fluid, and other nutrients that are found naturally in joints and connective tissue. These convenient ChewTabs are flavored with Argentinian beef liver, high in superoxide dismutase (SOD), for additional antioxidant activity and improved palatability.

90 Chewtabs

**3 Chewtabs Contain:**

Bovine Collagen .....	250 mg
Glucosamine Sulfate .....	250 mg
Sea Cucumber (Holothuria scabra) .....	150 mg
Boswellin (standardized Boswellia serrata supplying 30% boswellic acids) .....	125 mg
Vitamin C (ascorbic acid) .....	100 mg
Curcumin (standardized Curcuma longa supplying 90-95% curcuminoids) .....	75 mg
Ginger (Zingiber officinale root) .....	75 mg
