

Be Proactive With

Wellness Blood Testing

WWW.VDILAB.COM

Our Services

Wellness should be proactive, not reactive. VDI's wellness tests offer early disease detection & nutritional assessment combined with actionable next steps to keep your patients happy and healthy.

● Essential Wellness

Inflammation Assessment, Vitamin D, Vitamin B12

● Advanced Wellness

Inflammation Assessment, Vitamin D, Vitamin B12, Chem12

● Cancer Risk Assessment

Upgrade for wellness panels

Early indication that the pet is at risk of a cancer event in the coming 6 months. A true disease activity test for early detection.

● Joint Health Assessment

Upgrade for wellness panels

Early detection of degenerative joint disease allows you to begin managing it before it becomes clinically evident.

● Complete Wellness

Inflammation, Cancer Risk, & Joint Health Assessments, along with Vitamin D, Vitamin B12, Folate, Magnesium, Chem12

● Essential Vitamins

Many VDI wellness panels come with one or more essential vitamin tests. Nutrition plays a vital role in animal health, and checking for deficiencies in essential vitamins should be done with any wellness program.

Our Advantage

VDI wellness panels are designed to identify early problems and then give you the tools needed to resolve them. From industry-best testing to solutions for when results are abnormal, VDI is there.

Single Best Test for Health

Sensitive inflammation markers CRP and HPT are the single best tests to determine if a patient is healthy. Ask us why!

Maximize Your Time & Resources

VDI Wellness Panels are designed to help you identify which patients need more time and workup, and which ones don't.

Useful Direction When Abnormal

For the patients need more workup, VDI help direct you to probable source of issues using our AI-driven reports and provides actionable next steps.

Proactive Medicine

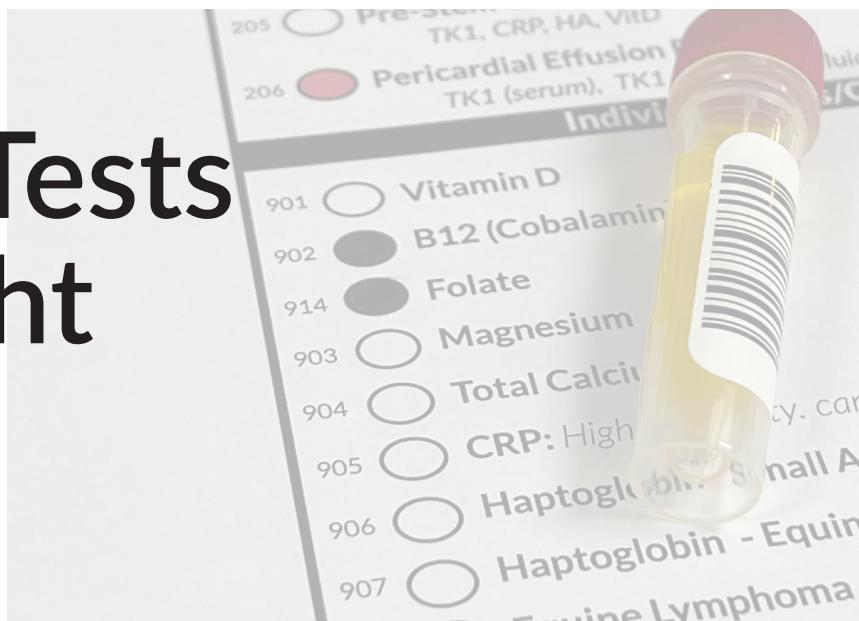

Identifying inflammation, vitamin deficiency, cancer risk or degenerative joint disease indicators gives you options to improve and maintain a healthy pet. VDI provides Test 'n Treat options to help correct issues before they become serious problems.

The Right Tests for the Right Decisions®

VDI is about providing solutions, not numbers on a page. Our wellness reports are designed to give you direction and solutions when abnormal results appear.

About Us

VDI is a leading veterinary blood diagnostics provider advancing the importance of specialty wellness testing in companion animals. With our Test 'n Treat approach to wellness we are providing veterinarians and their clients with complete solutions to identify and correct issues earlier and improve animal health.

We aim to help veterinarians offer a wellness test package that gives them actionable information to help any cat or dog that comes in, and to maximize their time and resources.
