Relevant Context (provided on TRF)

Corticosteroids Antibiotics Suspected Mass Hypercalcemia
 NSAIDs Anemia Enlarged Node B12 Deficiency
 Chemotherapy GI Signs Fever Known Disease

Neoplasia Index

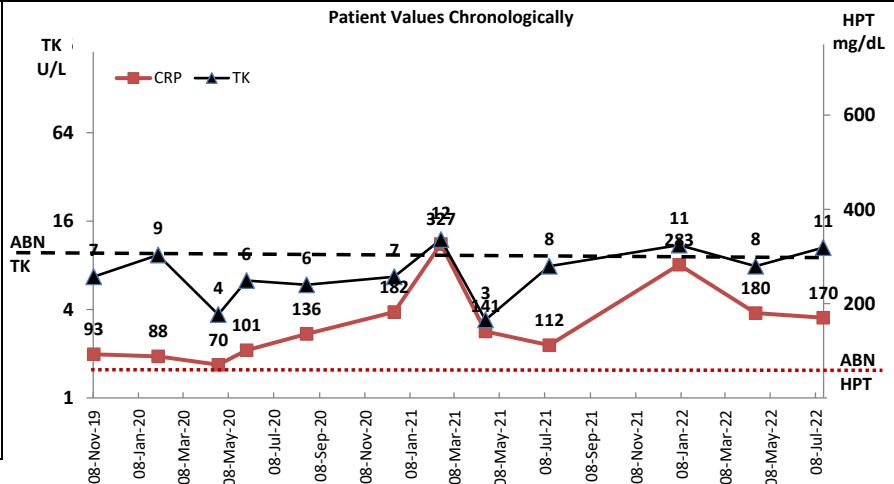

Positive: 5.4 - 10

Intpretative Comment

Patient values for TK1 are above the critical threshold and HPT is moderately elevated. No significant changes from prior testing. Elevated levels of TK1 are indicative of resistance to therapy. Continue monitoring. If the patient is on corticosteroids, other anti-inflammatory medication, or has uncontrolled Cushings, it can suppress HPT.

Spec ID	Date	TK Value	HPT Value
414949	08-Nov-19	6.7	92.7
419501	03-Feb-20	9.4	88.1
