Interpretive Comments - need consult? email consult@vdlab.com

Your patient is found to be deficient. Deficiency greatly increases risk of developing other serious diseases. Supplement with D3 per recommendations and retest in 8-10 weeks or 4 months for obese patients.

▶ Vitamin D levels below 30ng/mL in patients with GI disorders or kidney disease are often associated with PLE/PLN. Please evaluate patient accordingly.

If any of the following occur, wait 2 months from the date of change, then retest:

Major Diet Change

Change in Health Status (eg PLE)

Change of Vitamin D supplement or daily treats

Supplementation is stopped for longer than 4 weeks

Patient is put on Corticosteroids

Patient is put on NSAIDS
