

GlucaMune[™] GlucaMune[™] Forte

High Potency Beta Glucan Blend - Leading Edge Immune Modulator

GlucaMune[™] contains the highest potency, patented beta glucan available for companion animals, complexed with astragalus root and licorice root concentrates in small, easy-to-administer capsules for use in all veterinary companion animals. Capsules can also be opened and mixed with food for those difficult-to-pill patients.

In-vivo testing of this proprietary formulation demonstrates that the synergistic combination of beta glucan, astragalus root, and licorice root is more potent than any individual ingredient in terms of significant increases in measured macrophage phagocytosis and cytokine IL-2 release.
