

MegaFlex

Supports Healthy Joints, Connective Tissue, and Flexibility

MegaFlex is comprised of important nutrients for dogs and cats to complement their overall diet. MegaFlex is a high potency formula designed to nourish and support connective tissue for healthy, flexible joints and comfortable movement. The formula features glucosamine sulfate, a critical precursor of synovial fluid. Glucosamine sulfate has a low molecular weight allowing it to be well absorbed orally. Studies have found that glucosamine sulfate has a tropism for articular cartilage in the dog.

21.16 oz (600 gram) Powder | 600 Capsules

1 Scoop (1 tablespoon) / 4 Capsules Contain:

Glucosamine Sulfate (as 2KCl)	1000 mg
MSM (methylsulfonylmethane)	500 mg
Sea Cucumber Powder (parastichopus californicus)	300 mg
Vitamin C (ascorbic acid)	10 mg

Directions For Use (Powder):

One (1) heaping scoop for very large dogs (over 100 lbs.)
One (1) level scoop for large dogs (75-100 lbs.)
3/4 scoop for medium-sized dogs (50-75 lbs.)
1/4 to 1/2 scoop for small dogs and cats (up to 50 lbs.)
Dosage may be doubled for the initial 4-8 weeks for a more rapid response. Please consult with your veterinarian regarding your pet's schedule.
