

Phos-Bind

Supports Normal Function and Health of the Kidneys

Phos-Bind contains finely ground, USP grade, aluminum hydroxide. This superfine powder form of aluminum hydroxide has been found to be highly palatable when blended with a pet's meal. When used according to directions, Phos-Bind will complex with dietary phosphorus in the bowel to help support the normal function and health of the kidneys. The single ingredient found in Phos-Bind is preferred over other products by veterinary nephrologists and internists.

1.23 oz (35 gram) or 7 oz (200 gram) Powder

1.23 oz (35 gram) - 1 Scoop (1/8 teaspoon) Contains:

Aluminum Hydroxide (USP)250 mg

7 oz (200 gram) - 1 Scoop (1/4 teaspoon) Contains:

Aluminum Hydroxide (USP)500 mg

Directions For Use:

Give 100 mg/kg daily with meals. Dosage should be adjusted based on serial serum phosphorus determinations every 2-4 weeks or as indicated.
