

Rx B12 | Rx B12 Forte

A Palatable Source of Pure, High Quality Cyanocobalamin

Vitamin B12 traditionally has been administered parenterally. It can be challenging for clients to bring their pets in monthly for these injections. Recent studies have found that daily oral administration of cyanocobalamin will just as effectively increase serum cobalamin levels as monthly injections. Rx B12 and Rx B12 Forte come in a highly palatable liquid format for easy and convenient oral administration of cyanocobalamin to your patients.

Rx B12 - 4 fl. oz. (120 ml) | Rx B12 Forte - 2 fl. oz. (60 ml)

Rx B12 - Amount per 1 ml:

Vitamin B-12 (cyanocobalamin) 250 mcg

Rx B12 Forte - Amount per 1 ml:

Vitamin B-12 (cyanocobalamin) 1000 mcg

Directions For Use (Rx B12):

Cats and Small Dogs – 1 ml per day,
Medium Sized Dogs (25-50 lbs) – 2 ml per day,
Large Sized Dogs (50-100 lbs) – 3 ml per day.

Directions For Use (Rx B12 Forte):

Cats – 1/4 ml daily
Dogs less than 10 kg – 1/4 ml daily
Dogs 10-20 kg – 1/2 ml daily
Dogs 20-50 kg – 1 ml daily
Dogs > 50 kg – start at 2 ml daily for a month and recheck B12 levels and taper based on serum levels. Daily administration for 12 weeks to achieve a steady state, then recheck serum cobalamin levels and adjust accordingly. A vitamin B12 test is recommended in order to establish safe and effective administration levels.
